

2d. Fuel and flux: for smelting, abundant and contiguous to the furnaces, or at least cheap.

3d. Facilities for easy and cheap transportation.

have as tolerable a system of practical etymology as the 'aets will warrant; not very different either from that promulgated by the ordinary philologists, though they would carry it a good deal further. Here, however, let it not be too certain in our judgment. We have seen "fore-heads villainous low" on very noble fellows, and grand coats of heads on mere blocks and ignoramuses.
